

Dear customer,

We are pleased to announce that Nitro is now certified with the NAPIM (National Association of Printing Inks Manufacturers) stamp as a biorenewable product.

The main objective of NAPIM is to promote the development and improvement of the Printing Inks Industry.

**The stamp now received by Nitro identifies the use of renewable resources in printing ink formulations. Our nitrocellulose wetted in ethanol is 100% biorenewable and our nitrocellulose wetted in Isopropanol is 70% biorenewable. The content has been validated at an ISO/IEC 17025:2017 accredited laboratory in accordance with ASTM D6866-22.**

This recognition reflects our efforts to follow a continuous path towards even more sustainable solutions available in the market for its customers and contribute in our ESG journey.

Best Regards
